

3M™ Littmann® Master Classic II Stethoscopes

Commonly Asked Questions

Question:

How is the new Master Classic II different from the old Master Classic?

Answer:

The chestpiece was designed in 1996, resulting in an International Industrial Design Excellence Award for its ergonomic design. While it is still a single-sided chestpiece equipped with a tunable diaphragm, it has a sleeker, more high-tech look with additional weight added. The additional weight in the chestpiece contributes to better sound quality and a slight increase in sound intensity over the older Master Classic design.
